#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. Claims 8, 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is rejected because it is unclear what is meant by "built in one of a casenegative design, a case-positive design and a case-neutral design".

Claims 18-19 are rejected because these claim do not further limit claim 17 from which the claims depend from.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1745

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-3, 8-10, 17-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Kweon et al. (6,372,385).

Kweon et al. teaches a battery comprising a positive electrode where the surface of the active material is coated with a metal oxide. The method includes the steps of producing a crystalline powder of LiA1-x-yBxCyO2: coating the crystalline powder with a metal alkoxide sol; and heat-treating the powder coated with the metal oxide sol.

Kweon et al. teaches in column 7, example 5 that LiNi0.8Co0.2O2 powder coated with the Mg-methoxide. Kweon et al. teaches in column 6, Example 1, that the positive active material comprises the above active material, a conductive carbon, a PVDF binder and a solvent and that the negative electrode comprises lithium metal. The battery also comprises an electrolyte comprising EC:DMC at a 1:1 volume ratio and LiPF6.

4. Claims 1-2, 5, 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Takeuchi et al. (6,458,487).

Application/Control Number: 10/631,097 Page 4

Art Unit: 1745

Takeuchi et al. teaches a positive electrode active material comprising the formula Li1+xMn2-x-yMyO4. Takeuchi et al. teaches in columns 17-18, Table 1, that the cover layer comprises LiAlMnO4, Li4Ti5O12, etc. Takeuchi et al. teaches in columns 23-24, that the electrolyte comprises EC/EMC and LiPF6. Takeuchi et al. teaches in column 11, that the current collector can be aluminum foil, stainless steel foil, nickel foil and the like. Takeuchi et al. teaches in column 11, line 66 to column 12, line 6, that the negative electrode can comprise a light metal.

5. Claims 1-2, 5, 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Koga et al. (6,534,217).

Koga et al. teaches a secondary battery comprising a positive and a negative electrode where the positive electrode comprises a LiMn2O4 center and a ITO (indium tin oxide) or SnO2 covering layer. The quantity of the coating portion is 0.001 mol to 0.1 mol per 1 mol of center portion. Koga et al. teaches in column 2, that the center portion can comprise TiS2, MoSe2 or V2O5, etc. Koga et al. teaches in column 4, that the negative electrode comprising a material capable of occluding and releasing a lithium metal or lithium. Koga et al. teaches in column 8, that the electrolyte comprises LiPF6, EC and MEC.

6. Claims 1-3, 5-6, 8-10, 17-19, 21-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Kweon et al. (6,737,195).

**Art Unit: 1745** 

Kweon et al. teaches a positive active material comprising LixNi1-xy-zMnyO2 core and a metal oxide layer formed on the core. Kweon et al. teaches in column 3, that it is preferable that the thickness of the metal oxide layer is 1-100 nm and that the metal of the metal oxide layer can be V, Sn, Mg, Al, etc. Kweon et al. teaches in column 6, line 56 to column 7, line 4, that a cell was fabricated with the positive electrode on an aluminum foil current collector and a lithium metal counter electrode comprising an electrolyte comprising LiPF6 in EC and DMC. Kweon et al. shows in Figures 1A-1B the particle size.

### Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 11-13, 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kweon et al. (6,372,385) or Kweon et al. (6,737,195) or Takeuchi et al. (6,458,487) or Koga et al. (6,534,217).

Kweon et al. or Takeuchi et al. or Koga et al. teaches the claimed battery but does not specifically teach that the battery can be employed in or as a medical device.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from

Art Unit: 1745

a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham, 2 USPQ2d 1647 (1987)*.

## Allowable Subject Matter

9. Claims 4, 14 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura S. Weiner whose telephone number is 571-272-1294. The examiner can normally be reached on M-F (6:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571/272-1000.
